

Web Development with Node.js and MongoDB

Andrew Marcinkevičius

Video 2.2

npm

In this Video, we are going to take a look at...

- What is npm
- Installing npm
- Fixing permissions
- Managing packages

find packages

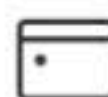

sign up or log in

npm is the package manager for **jquery**

226,573
total packages

142,984,970
downloads in the last day

771,474,930
downloads in the last week

2,614,392,837
downloads in the last month

packages people 'npm install' a lot

browserify

browser-side require() the node way
10.2.6 published 6 months ago by substack

express

express

Fast, unopinionated, minimalist web framework
4.13.1 published 6 months ago by dougwilson

pm2

Production process manager for Node.JS appli...
0.14.3 published 6 months ago by jshkurti

grunt-cli

The grunt command line interface.
0.1.13 published 2 years ago by tkellen

npm

a package manager for JavaScript
2.13.0 published 6 months ago by zkat

karma

Spectacular Test Runner for JavaScript.
0.13.1 published 6 months ago by dignifiedquire

bower

The browser package manager
1.4.1 published 9 months ago by choonun

cordova

Cordova command line interface tool
5.1.1 published 7 months ago by ctavel

coffee-script

Unfancy JavaScript
1.9.2 published 8 months ago by jashkenas

ifdattic at ifdattic-mbp13 in ~/projects/nodejs-mongodb-video-course/code/2/2.2 on master [!]

- 03 - Fixing npm permissions
- 04 - Installing npm packages locally
- 05 - Using a `package.json`
- 06 - Updating local packages
- 07 - Uninstalling local packages
- 08 - Installing npm packages globally
- 09 - Updating global packages
- 10 - Uninstalling global packages
- 11 - Creating Node.js modules

Installing Node.js and updating npm

```
npm config set prefix '~/.npm-global'
```

3. Open or create a `~/.profile` file and add this line:

```
export PATH=~/.npm-global/bin:$PATH
```

4. Back on the command line, update your system variables:

```
source ~/.profile
```

Test: Download a package globally without using `sudo` .

```
npm install -g jshint
```

Instead of steps 2-4 you can also use the corresponding ENV variable (e.g. if you don't want to modify `~/.profile`):

```
NPM_CONFIG_PREFIX=~/.npm-global npm install -g jshint
```

ifdattic at ifdattic-mbp13 in ~/projects/nodejs-mongodb-video-course/code/2/2.2 on master [!]

```
$ npm config set prefix '~/.npm-global'
```

ifdattic at ifdattic-mbp13 in ~/projects/nodejs-mongodb-video-course/code/2/2.2 on master [!]

```
$ █
```

[udemy] VIDEO

Versions

- ^version - Until major
 - ^1.3.2 will install higher than *1.3.1* but less than *2.0.0*
- version - Match exactly
 - 1.3.2 will install *1.3.2*
- ~version - Approximately
 - ~1.3 will install incrementing right most digit (For example, *1.3.2*)
- 1.3.x - Increment x digit (For example, *1.3.2*)

Versions

- `>version` - Greater than
 - `>1.3.2` will install `1.3.3` or greater
- `>=version` - Greater than or equal
 - `>=1.3.2` will install `1.3.2` or greater
- `<version` - Less than; `<=version` - Less than or equal
- `*` - Any version
- `tag` - Version tagged as (For Example, latest)
